# Causes of Individual Differences:

- **Heredity:**
- Some heretical traits bring a change from one individual to other. An individual's height, size, shape and color of hair, shape of face, nose, hands and legs so to say the entire structure of the body is determined by his heretical qualities. Intellectual differences are also to a great extent influenced by hereditary factor.

- **Environment:**

- Environment brings individual differences in behaviour, activities, attitude, and style of life characteristics. Personality etc. Environment does not refer only physical surroundings but also it refers the different types of people, society, their culture, customs, traditions, social heritage, ideas and ideals.

- **Race and Nationality:**
- Race and Nationality is one cause of individual difference. Indians are very peace loving, Chinese are cruel; Americans are very frank due to race and nationality.

- **Sex:**
- Due to sex variation one individual differs from other. Men are strong in mental power. On the other hand women on the average show small superiority over men in memory, language and aesthetic sense. Women excel the men in shouldering social responsibilities and have a better control over their emotions.

- **Age:**
- Age is another factor which is responsible in bringing individual differences. Learning ability and adjustment capacity naturally grow with age. When one grows in age can acquire better control over our emotions and better social responsibilities. When a child grows then this maturity and development goes side by side.

- **Education:**
- Education is one major factor which brings individual differences. There is a wide gap in the behaviors of educated and uneducated persons. All traits of human beings like social, emotional and intellectual are controlled and modified through proper education.
